Software Architect

Overview

Creating Karate Test Cases

- Authentication
- Headers
- Reusable Features
- API Parameters
- Assertions
- Functions

Making Authenticated Requests

Creating Reusable Scenarios in Karate

Passing Parameters to API’s

Working with Assertions

Fuzzy Matching Response Data with Karate

API Response

```
[
   {
      "id":5,
      "name":"Fitness Workshop",
      "description":"Learn...",
      "maxCapacity":50,
      "date":1696197600000,
      "startTime":"5:30 PM",
      "currentCapacity":49
   },
. . .
]
```

Fuzzy Matching

#null

#notnull

#present

#notpresent

#array

#object

#boolean

#number

#string

#uuid

#regex
